

***PERMADUR* Multiple Part Handling Systems dramatically increase torch ON time**

The System pictured is a *PERMADUR* Series 115 Plate/Multiple Part Handling System with 15ea. BP-1600x72 Lifting Magnets on a 10' load beam. The Magnet are fixed on 8" Centers. The Controller provides Selectivity by Magnet, 15ea., and *PERMADUR's* Exclusive Safety Indicator Lighting System that confirms the Magnets have attached to the load in preparation for a safe lift. This Controller was also built System ON/OFF/HIGH Radio Controls in addition to the hard wired PB Pendant Controls. The System also included our Skeleton Picker Frame Assembly to support the separation of Parts/Skeleton at a Parts Separation area. Finally, the System Load Beam supported attachment to a single hook crane via our Low Headroom Intermediate Beam design.
