

The above pictured System is a **PERMADUR Series 408 Plate/Part Handling System**. This System consisted of a 1500 Power Pac and eight Vacuum Pads on a 36' Load Beam. Eight VPN-24-30 Vacuum Pads on four Crossarms support 10'x40' Plate Loading. The System Load beam was designed to be attached to a Double Hook Crane. The System is powered by a 460 VAC power supply and provides an Interface with Crane Radio Remote ON/OFF/OFF Controls.
