

Pictured above is a Permadur Series 102 Plate/Part Handling System with 2ea. TP-2000 Lifting Magnets suspended on an 8' load beam with a Shackle/Ring and 2 Part Sling Assembly for attachment to a single hook hoist. The System includes a (-1E) 19.2VDC Nicad Battery Powered Master/Slave Pushbutton Controller mounted on the Master Magnet. The Slave Magnet includes a 4' Coil Cord with a Male QD for tie-in to the Master/Slave Controller. Both Magnets are attached to the load beam via 3/4" Bolts to support repositioning on 1' Centers along the load beam. The Master Magnet can also be used apart from the System as an individual Magnet for handling smaller parts. The Master/Slave Controller includes Permadur's Exclusive (-S) Safety Indicator Lighting System to tell the Operator when the Magnets have attached to the load in preparation for a safe lift. This Controller also includes our (-RR) Radio Remote Controls with built-in Receiver and handheld Transmitter
