

The above pictured System is a **PERMADUR Series 927 Plate Handling System**. This System consists of a 3000 Power Pac and 27ea. VPN-16-30 Neoprene Vacuum Pads on a 53.5' Load beam with 9ea. 8' long Rotating Crossarms. The load beam was designed to interface with a Double Hook Crane with hooks on 30' Centers. Each Pad include individual manual Shut off valves. The crossarms and the outside pads on the crossarms could be repositioned to address changes in plate sizes. The Power Pac is powered by 460VAC, 3 Phase power from the Crane. An ON/OFF Pushbutton Pendant on a 15' Cord supports operator controls and a Vacuum Reserve Tank provides backup if power fails. A Center bail was provided for System carrying only.
