

**PERMADUR Plate Handling Systems provides SAFE and EFFICIENT Material Handling**

The System pictured is a *PERMADUR* Series 306 Plate Handling System with 6ea. FP-4000 Lifting Magnets on a 14' load beam. The Outside Magnet rows can be adjusted along the length of the load beam via Cam Followers. The Controller pictured provides Selectivity by Row, 3ea. The Controller also offers *PERMADUR's* Exclusive Safety Indicator Lighting System that confirms that the Magnets have attached to the load in preparation for a safe lift. This System attaches to a Single Hook Hoist via a 4 Part Sling Assembly. The power supply for this System is 460 VAC. *PERMADUR* Lifting Magnets are Electrically Controlled Permanent Magnets that will not drop a suspended load due to loss of electrical power. No Back Up Battery System is required.
