

The above pictured Vacuum Lifting System is a *PERMADUR* Series 204 Plate Handling System. This System consisted of a 250 Power Pac and four Vacuum Pads on an 8' Load Beam. The four VPN-6SO-30 Vacuum Pads are positioned on 2ea. 3' Crossarms. The Controls consist of an ON/OFF Slide Valve mounted on an operator guide handle that is adjustable up to 30" from Power Pac. Power Pac utilizes 115 VAC Power Supply by customer.
